

REFERENCES

Felix Nielsen, Technical Director and Partner, Bacon de Czar.

I had the pleasure of working with Jack on several projects; developing small games, implementing playful animations, building whole websites.

Jack is also a strong conceper and a great asset in any brainstorm. Overall it was great to observe an open mind that evolves rapidly with every task.

A great visual programmer in the making.

Stephan Thiel, Co-Founder, Studio Nand.

We had the pleasure of working with Jack at NAND on the redesign of Creative Coding.

He does not only have strong graphic and interaction design skills but also works meticulously until every detail in a design is right. In addition to that, Creative Coding also benefitted to a great extend from his interdisciplinary and open mindset.

Gabbi Cahane, Partner, Meanwhile.

Quite simply, Jack is awesome. A smart, enthusiastic and committed individual that is continually looking to learn, develop, think, invent and create wonderful things.

Anna-Louise Gordon, Visual Effects Producer, Prime Focus.

He is so enthusiastic and ready to tackle anything, usually with success. He is a pleasure to have on any team and I really can't recommend him any more. I would work with him again any time.
